4 Reviews Item #: OLIGHT-M20S-X-L2-DLX Brand: Olight

Olight's Tactical Flagship

The Bread-N-Butter

The Olight M20SX-L2 has been a top-tier tactical light since its inception. Since then, it has undergone a variety of upgrades and improvements that have maintained its spot at the top of its class. This innovative tactical flashlight features dual tail switches and can be fitted with a family of tactical accessories. Olight's world-famous toughness is maintained with a military standard anodized aluminum body and stainless steel components. The M20SX-L2 is a great choice for personal protection because of the blinding light and crenelated strike bezel, but is also a must-have tool for those who go into harm's way.

Lighting Technology

Super Bright

Equipped with the latest and greatest CREE XM-L2 LED, the M20SX-L2 produces a hefty 550 lumens in High mode. While in Low mode, which outputs 10 lumens, this tactical wonder can run up to 85 hours. A specialized smooth reflector projects the beam up to 197 meters while maintaining healthy peripheral illumination. The peak beam intensity is equivalent to lighting 9,700 candles.

Tactical Interface

Special Operations

The tactical tail switch and "Cigar Grip" design allows for a variety of tactical holds for versatile usage with firearms. Coupled with an easy-to-find side switch, you're able to cycle through modes with single presses and access the strobe with a press and hold, from the ON position. Also, the tail switch can be half-pressed for momentary on or clicked in place for constant on. A double press brings the light immediately to high mode while a triple press activates the strobe from the off position.

Power

Plenty of Accessories

The M20SX-L2 is powered by either one 18650 or two CR123A batteries and features reverse polarity protection, so you don't have to worry about inserting the batteries the wrong way. As mentioned earlier there are a slew of options for the M20SX-L2, including a [Magnetic X Weapon Mount](#). If you would like to see all of the accessories available, check out the [Accessories](#) page and you'll be ready for any tactical situation in no time!

Deluxe Package Includes: Flashlight, Lanyard, 2x Spare O-Rings, 2x CR123A , White Diffuser, Holster, Battery Magazine, Silicon Rubber Boot (fluorescent), and a Manual/Warranty Card

TOP

- Multi-function click tail-switch with momentary activation
- Innovative tactical user interface and dual tail switches
- Equipped with a double CR123A size battery magazine
- Rectangle threads, new pocket clip, as well as new position structure for cigar holder
- Aircraft-grade body with anti-scratch Type III hard anodizing
