

NOTICE

- Please choose a proper adapter or USB power source to ensure the best charging efficiency for your light.
- DO NOT use any adapter or USB power source insufficient to provide 5W power output, otherwise the charging time will be longer.
- When the Oport charges a light to 95%, its indicator will turn green. Then, the trickle charge will start and go on until the light is charged to 100%.
- During charging, if the Oport is repeatedly disconnected from the light in charging for 4 times or more, it will enter safe charging mode with a charging current of 0.5A or 1A.
- To charge another light, please remove the light currently in charging and wait for a second until the indicator turns green before you put in a new light. Otherwise, the Oport may charge the new light with an improper charging current and thus may damage its battery.

COMPATIBLE OLIGHT PRODUCTS:

Warrior Mini 2, Warrior X/X Pro/X Turbo, M2R Warrior, M2R Pro Warrior, S1R, S1R II, S2R, S2R II, S10R III, S30R III, Baton 3, Baton Pro, Odin, Odin Mini, Odin Turbo, Seeker 2/2 Pro, Perun, Perun 2, Perun Mini, Array, Freyr, Obulb, Javelot Turbo, H1R, H2R.

Note: Not suitable for other products.

USB-C port input: 5V $\overline{\text{---}}$ 2A

Magnetic charging port output:

4.2V $\overline{\text{---}}$ 0.65A/1A/1.5A/2A

Charging pattern: CC/CV

Weight: 21.8g/0.77oz

Size: 35.5*21.9*9.6mm/1.4*0.86*0.38in
