BATTERY AND SAFETY WARNINGS:

• Do not use unsupported batteries with this flashlight.

• Use caution on high outputs or long runtimes as flashlight may get hot.

• Before storing the flashlight, turn the tailcap a half turn counterclockwise to disconnect the circuit.

HOW TO OPERATE

ON/OFF: Click the side switch to turn flashlight on.

CHANGE BRIGHTNESS LEVEL (FIG A)
Press and hold the side switch when the light is on. The brightness levels will cycle up then repeat low – medium – high until level is selected. Release the switch when on the desired brightness level to select it.

STROBE: Double click the switch will activate the strobe mode, hold the switch for 1 second will return to constant on.

LOCK OUT: (FIG B) Press and hold the side switch for approximately two seconds when the light is off. The light will quickly flash the memorized mode then turn off. Under lock out status, the red indicator under the switch instantly lights on to respond your operate on the switch. The lock out mode will prevent the side switch and tail cap from turning on to prevent accidental activation.
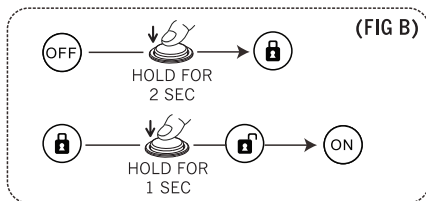

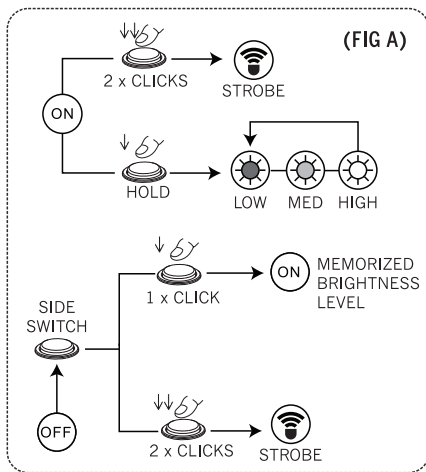

UNLOCK: (FIG B) Press and hold the side switch for approximately one second when the light is locked. The light will automatically be in memorized mode.

BATTERY CHARGING: R40 has a built-in charger, the charging input port is an universal micro-usb socket covered by a rubber plug in the tail cap, charging start while connecting the flashlight with included USB power by the USB cable. A dual color indicator underneath the input port displays charging state, red light means charging is in process, green light means charging completed. After unplugging USB plug, please restore the rubber cover to his seat to prevent the dust or other something blocking the input port.

Low battery warning: There is a red led under the switch, it will blink by twice every 3 seconds when the battery voltage drop down to lower level.

Warning:
• DO NOT attempt to charge a standard 26650 with the integrated charger, it will cause the damage of product.
• DO NOT try to use included 26650 battery to other product, this battery are specially designed for R40, it will not work in most other lights.
• Included USB cable is just for power transmission for R40, can not be used in other device.
