

Olight S1-Br PVD Baton Brass Neutral White LED Exclusive Limited Edition Flashlight

The S1-Br is a worldwide exclusive for Going Gear limited to 500 total lights (250 each finish).

The Olight S1 Baton is a tiny, high output light with a long list of great features. The S1-Br is all of that, but in a solid brass body.

The S1-Br is available in a raw, uncoated brass with stainless steel hardware or a clear PVD coated body with blue hardware. The body of the S1-Br PVD is clear PVD coated for a long lasting, durable finish. If you prefer a weathered, personalized look to your lights, check out the S1-Br Raw.

Like the regular S1, you still have a blinding high output (480 lumens on max), low output (0.5 lumens on moonlight), magnetic tailcap, TIR optic, great interface, compact size, and soft silicone button that made the original S1 one of Olight's most popular lights ever. The brass body is accented with a silver-colored stainless steel bezel and switch ring on the Raw version and blue PVD coated bezel and switch ring on the PVD version. Both versions come with a sturdy, deep-carry stainless steel pocket clip.

Features:

- Thumb sized form factor.
 - diameter: 21mm
 - length: 61mm
- Weight: 30g (excluding battery)
- Stainless steel bezel and switch ring (silver colored on Raw, blue PVD on PVD)
- Recessed silicon switch to prevent accidental operation.
- TIR lens to create a balanced beam.

Olight S1-Br PVD Baton Brass Neutral White LED Exclusive Limited Edition Flashlight

- Positive polarity on the battery faces the tail of the flashlight for enhanced reliability and a more compact size.
