DESCRIPTION

The S2A Baton is a compact flashlight with a side switch and variable outputs. It uses Cree XM-L2 LED and runs on two AA batteries. Coupled with TIR lens of ultra light transmission rate, it can produce a balanced beam. The S2A Baton has five brightness levels and a strobe mode, with an output ranging from 0.5 up to 550 lumens. To improve hand holding and gripping experience, the main flashlight body is wrapped in skin safe soft silicon in black, and with various color choices - fluorescent blue/yellow/gray. Also there are blue rings on the flashlight head and the side switch.
The S2A Baton serves as a perfect choice for home and outdoor illumination.
