

Are some SMINI Cu lights made of brass?

There seems to be a popular notion that some Olight SMINI Baton “Cu” lights are made of brass.

The Raw Brass BR is made of brass; the Raw Copper Cu is made of copper. But the Rose Gold Cu and Black Onyx Cu are said to be made of brass. Olight was just confused. There is a line in one user manual that implies these last two are brass. But it just isn't so.

My measurements:

SMINI Version	Weighed Grams	Listed Grams
SMINI BATON Ti (Polished)	31.1	31.5
SMINI BATON Ti (Bead Blasted)	31.4	31.5
SMINI BATON Ti (Rainbow PVD)	31.4	31.5
SMINI BATON Sus (Thunder Grey)	48.9	48.8
SMINI BATON Br (Raw Brass)	51.1	50.3
SMINI BATON Cu (Raw Copper)	53.7	54.8
SMINI BATON Cu (Rose Gold))	55.1	54.8
SMINI BATON Cu (Black Onyx)	56.2	54.8

It's pretty simple – Cu lights are made of copper.
