Operation:

1. Install the battery as shown in the figure.

If with TC10 Titanium battery tube:

2. Press the tail switch to turn on/off the light. Gently press the tail switch when light on and release it within 1 second, light will enter into next mode. The cycle return is high, strobe then low.
Auto-memorize function: the light will enter into the mode you used last time automatically.
Note: when battery voltage lower than 1.3v, there will be little difference for high and low output.

Olight Light Warranty

Olight warrants its products to be free from defects in materials and workmanship. Within 30 days after receipt, any defective lights will be offered free replacement by Olight distributors unconditionally. Olight will repair or replace, at its option and without charge, any product or part which is found to be defective under normal use and service within 24 months counting from the date of purchasing with proof of purchase. Such repair or replacement shall be the purchaser's sole and exclusive remedy under this warranty. This warranty does not cover normal maintenance and service and does not apply to any products or parts which have been subject to modification, misuse, negligence, accident, improper maintenance or repair by anyone other than Olight. As to those exceed 24 months of the purchase date, Olight will still provide with warranty service. Labor is free but cost of parts will be charged. Freight should be paid by customers.
