Olight Lithium Iron Battery for Improved Runtime

The i3E gift box edition comes with a high capacity Olight AAA lithium iron battery with over twice the power and only 65% of the weight of a standard alkaline battery increasing the runtime to over two hours.

Compact and Stylish

At only 60.5mm long and 14mm wide, the i3E EOS is the smallest flashlight that Olight has ever produced. It also comes in five anodized colors to match any style. It can be attached to a keychain, handbag, or conveniently slide into a backpack or pocket.
