

## Olight ORB-186S30 Cell

Cc

### A New 18650 is in Town

Olight's new *ORB-186s30 Battery* is designed for continuous high drain, featuring a rated discharge current of 15A (max 20A). This higher discharge rate meets the requirements for many high-lumen flashlights on the market, assuring you get every lumen you paid for. The *186s30* uses superior lithium-ion chemistry and can be charged for at least 500 cycles, saving you money on batteries down the road.

- **Battery Size:** 18650
- **Battery Chemistry:** Li-Ion
- **Nominal Voltage:** 3.6V
- **Nominal Capacity:** 3000mAh
- **Rated Discharge Current:** 15A
- **Estimated Charge Cycles:** 500cycles
- **Max Discharge Current:** 20A
- **Dimensions:**
  - *Length* - 2.74" (69.5mm)
  - *Diameter* - .73" (18.6mm)
- **Weight:** 1.8oz. (51g)
