APPLICATIONS

Road Cycling

Urban Riding

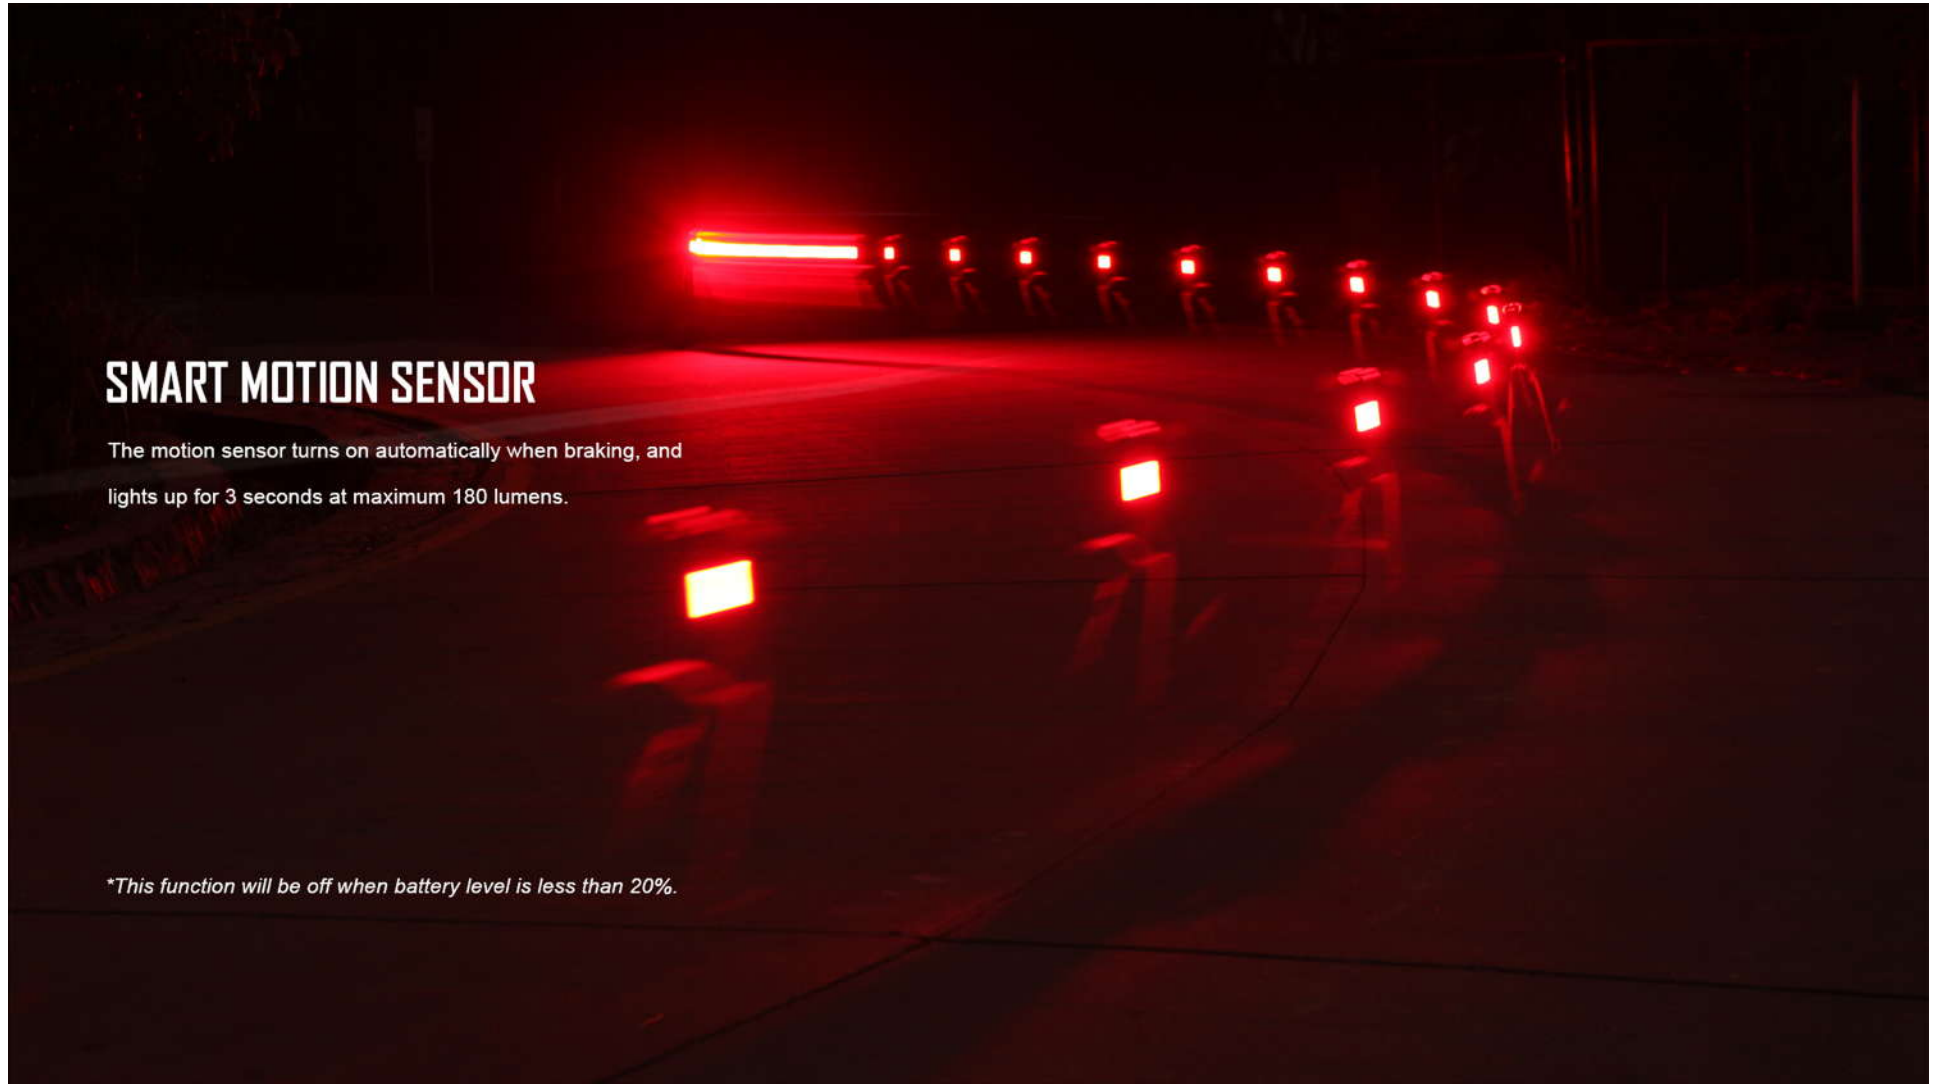

Daily Commuting

Olight / Magicshine RN 180 TL Bicycle Taillight

✔ Smart Motion Sensor

A built-in motion sensor automatically turns to a brighter steady output when braking normally.

SMART MOTION SENSOR

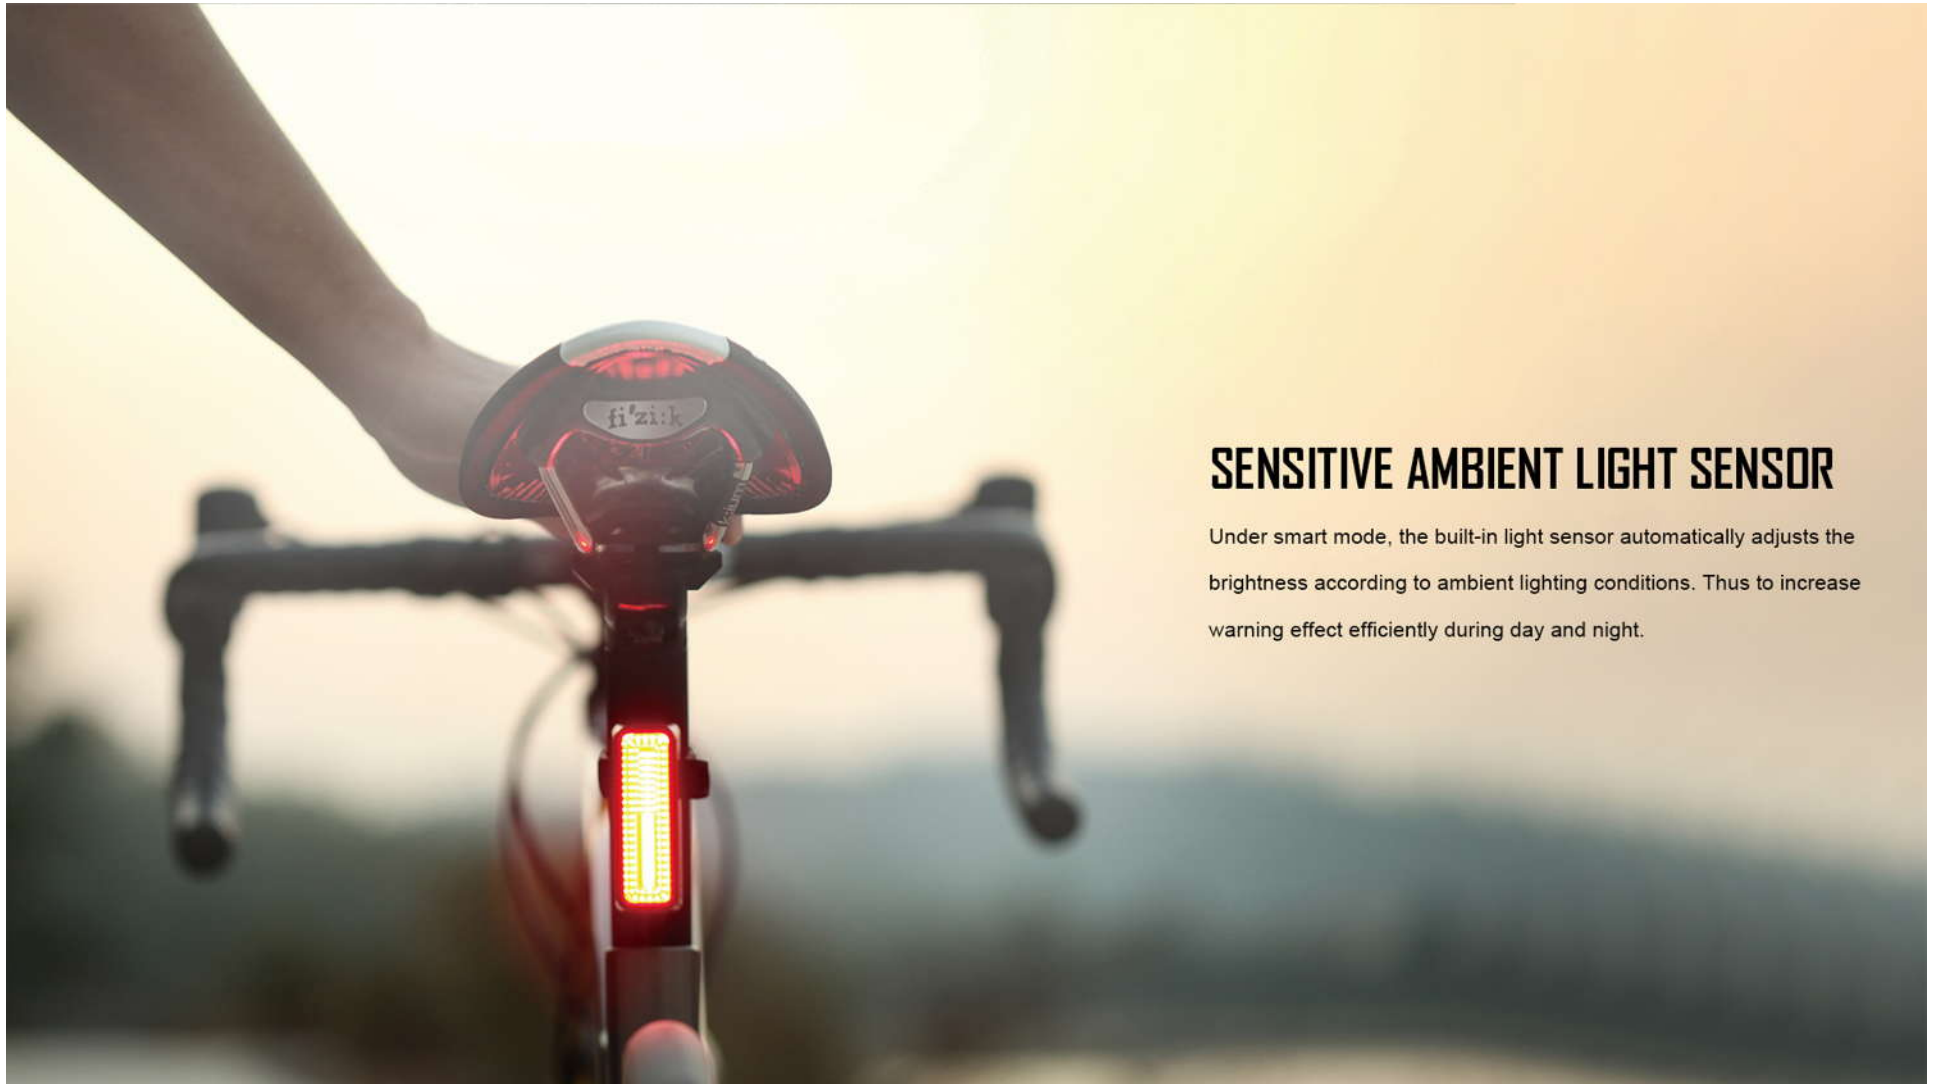

The motion sensor turns on automatically when braking, and lights up for 3 seconds at maximum 180 lumens.

**This function will be off when battery level is less than 20%.*

Olight / Magicshine RN 180 TL Bicycle Taillight

✔ Sensitive Ambient Light Sensor

With the same sensors, the tail light enters into a sleep mode to save power after one minute of inactivity. Any movement will immediately re-activate the unit.

SENSITIVE AMBIENT LIGHT SENSOR

Under smart mode, the built-in light sensor automatically adjusts the brightness according to ambient lighting conditions. Thus to increase warning effect efficiently during day and night.

Olight / Magicshine RN 180 TL Bicycle Taillight
