

S30R Javelot

The S30R Javelot is the long beam distance version of our extremely popular S30R II. The S30R Javelot has a maximum of 900 lumens and a beam distance of 264m/866ft. The aircraft-grade aluminum body contains the all new CREE XP-L HI LED which delivers a cool white focused beam for long distance. The S30R Javelot allows you to have the performance of a large flashlight in the palm of your hand.

Output (Tested by 2600mAh 18650 Battery)

Turbo: 900Lumens/3Mins + 500 Lumens /90Mins

High : 400 Lumens/130Mins

MED : 80 Lumens/9Hrs

Low: 20 Lumens/53Hrs

Moonlight: 1 Lumens/38Days

Strobe Mode: 900 Lumens/10Hz 180Mins

Beam Distance: 264M/866 Feet

Candela : 18500cd

Waterproof: IPX8

Impact Resistance : 1.5M

LENS

Tough Ultra-clear Tempered Glass with Two-sided

Anti-reflective Coating

LIGHT SOURCE

Flashlight: L 118.5mm*D26mm/4.67in*1.02in

Charging Dock: 2.17*1.97*0.63in/55*50*16mm

Weight: 122g/4.3oz(Flashlight with Battery),24g/0.85oz(Charging Dock).

BODY MATERIAL

Type-III Hard Anodizing, Aircraft-grade Aluminum

BATTERY
