ST25 BATON
Variable-output dual switch LED flashlight

OLIGHT™

MARKET APPLICATIONS

Tactical, Law Enforcement, Houshold, Self-Defense

DESCRIPTION

The ST25 Baton is the next evolution of our extremely popular and versatile S Series. In addition to a side switch is the introduction of our newly developed Stealth tailcap. This innovative switch allows the user to click for constant on and off without the audible sound of traditional click tailcaps, and remains flat so the light can stand on its end. With an industry-leading CREE XM-L2 that yields five different brightness levels and a strobe, the ST25 can accommodate any low-light situation. Access the 550-lumen turbo mode with a quick double click to provide powerful illumination as soon as you need it. When you need less light, just press and hold to directly activate the useful moonlight mode. The ST25 is also designed for a quick release from the multi-positional pocket clip. If wearing the flashlight on a belt or outside of the pocket, it can also be returned to the pocket clip easily with the larger, smooth surface. Two economical and commonly found AA batteries provide over eight days of light. Given such a convenient power source and so many output options, the newest member of the S series makes an optimal illumination tool.

Side switch cycles through three brightness levels and activates strobe and turbo modes

Cree XM-L2 LED

Lightweight, MilSpec Type III hard-anodized aluminum body construction

Anti-roll bezel

Flat Stealth tailcap that allows for quiet constant on switching

Multi-position pocket clip that allows flashlight to be quickly deployed
